

PROPANE Bulk Plants

One Resource

We have professionals on the team at every level of a project to complete plants that are well-planned and well built.

- ▶ In-house engineering team ensures projects are designed to the safest and strongest standards
- ▶ New Westmor manufactured tanks up to 40,000 gallon
- ▶ Used and refurbished tanks
- ▶ Two member installation crews guarantee both minimum down for the site and a safe working environment

Commitment to Quality

A commitment to a better value means our bulk plants are built to last by a staff dedicated to a strong work ethic.

- ▶ Plants outfitted with brand new piping packages rather than used materials
- ▶ Welded pipes and fittings maintain straighter, more durable systems compared to threaded
- ▶ Welding crews receive regular training and are 6G certified

Certified and Compliant

We monitor the latest state and federal regulations to ensure our work is up to code.

- ▶ Plants constructed to the most recent of NFPA compliance codes
- ▶ Installation crews are trained and certified in the states they serve
- ▶ In-house regulation experts

LP Bulk Plants

Engineering, Manufacturing, and Installation

30,000 Gallon LP Bulk Storage Plant

Our Commitment

“ They helped **clean out** and **tear down** our five older existing plants. The [Westmor] group is **easy to work** with, and **easy to talk** to at a level where we can understand what’s going on. There were **no communication gaps.** ”
